

AWS-200 Vertical 6100 System with High Resolution Camera and Monitor

With 30 years experience in designing and manufacturing welding lathes, WELDLOGIC sets a new standard in positioner design.

For the pressure sensor industry Weldlogic Inc. had to produce a low-heat hermetic seal weld with no distortion for a high volume and user friendly system. Our engineers developed a High Resolution Camera and Monitor to enable the operator to easily identify the alignment of the electrode to the weld zone area.

Application

- Welding 316-SS Diaphragm to weld ring and body

Requirements

- Low heat Hermetic Seal weld
- No distortion
- High volume

Industry

- Sensor / Instrumentation
- Critical alignment of electrode
