FOR ADVANCED
MANUFACTURING

Plasma | Tig | Laser | Mig | Sub-Arc

HIGH PRODUCTION
450 + Tubes Per Hour C.N.C. Seam Welder

SEE IT IN ACTION 

■ **Engineering Challenge**

CHALLENGE ▼

To build a cell to produce high volumes of high tolerance tubes +/- 004" in high volumes per hour exceeding 450 + P.P.H.

The weld quality had to enable post weld spin forming.

SOLUTION ▼

Weldlogic engineers designed and built a dual seam weld cell that enables one operator to simply pace the tube in the seam welder cradle and the rest is "ALL" done automatically and ejects the welded tube to a escapement

This enables the system to run fully automatic without even a button pushed. Weldlogic offers, Tig, Plasma, Laser and Mig weld processes to enable high production tube manufacturing.
