CHALLENGE ▼

Weldlogic has been challenged to design and build a Universal Laser weld cell than can make rotary welds, linear welds, spot welds and multi-axis / multiple part pallet weld system.

Weldlogic customers are always looking for a Laser Cell to enable multiple part configuration welding without lots of system change over time.

Engineering Challenge

SOLUTION ▼

Weldlogic Engineering Team listened to our customer requests and has developed a Universal Robotic Laser Weld Cell to offer the end user a very user friendly Programmable Laser cell.

The Robot can make the simplest to the most complex motion holding positional accuracy of +/- .002" or better. This flexibility enable a single cell purchase to never be obsolete if a new requirements comes along.

Rotary Stages with tail stock and quick change tooling enables the Universal Robotic Laser Weld Cell to meet all your current and future application needs.
