Engineering Challenge

CHALLENGE ▼

Today in the U.S. there is a crippling shortage of skilled welder in the precision manufacturing sector.

Over 450,000 jobs opening in the welding field, go unfilled due to a lack of trained and skilled welders.

Making a skilled welder very costly and rare. Weldlogic Engineering has been tasked by many firearms manufactures to design AUTOMATIC laser welding weld cells to significantly reduce or eliminate the high welding skill levels & costs required to make these very precise micro welds in today's labor market.

SOLUTION ▼

Weldlogic Weld Process Specialists have applied our Laser Weld Process to this special low distortion application to offer near perfect alignment and high strength under extreme conditions.

Our system offers high speed, low heat input, high strength, and very low operator skills. To manufacture welded assemblies at rates of 30-40 completed assemblies per hour.
