HDS-18 Heavy Duty Servo Driven 4-Roll Bending System

SEE IT IN ACTION

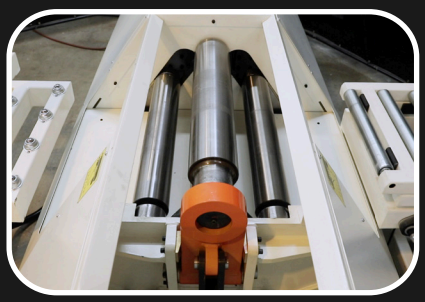
Engineering Challenge

CHALLENGE

Design and build a Pipe Grade 4-Roll with C.N.C. bending capability to address a wide range of plate thicknesses for and hold the accuracy of bend to +/- 1 degree bend accuracy.

SOLUTION

Weldlogic Engineering designed a A.C. Servo Driven 4-Roll bending system with high torch to form a wide range of thicknesses. The system offered memory and material infeed & back side support to hold the high accuracy of forming requirements. Light curtains were added to protect the safety of the operators.



Contact Weldlogic Tech-Sales to receive a welding system solution for your requirements.
